

Example Messages Overview Volume 5 – Provider Registry

Overview

This document is in addition to the Example Messages Overview Document and includes specific information for Volume 5 example instances.

Scope

The sample messages developed to date cover the following interactions:

- R1.1 - Add Provider (PRPM_IN301010CA, PRPM_IN301011CA)
- R1.3 - Update Provider (PRPM_IN303010CA, PRPM_IN303011CA)
- R2.1 - Find Associated Provider Identifiers Query (PRPM_IN306050CA, PRPM_IN306051CA)
- R2.2 - Provider Details Query (PRPM_IN306010CA, PRPM_IN306011CA)

For each of the included interactions, all mandatory and populated attributes and associations are included. In addition to the inclusion of some of the required attributes, the examples also illustrate the use of all external vocabulary code sets.

Scenarios

The example messages developed for this value were created in sets; also known as scenarios. Scenarios usually cover an entire transaction, or multiple transactions and allow the creation of sets of messages that rely on each other's data (e.g. in a request/response scenario, the message id of the request message is echoed in the response message).

Known Issues

Validation Errors

- No known issues.

Content Issues

- Dates within each scenario are not always aligned with each other (request message creationTime before the response message creationTime)

Example Data
