- C15.01 – Special Authorization (FICR_MT400001CA, FICR_MT400004CA)
- C15.02 – Cancel Special Authorization (FICR_MT400005CA, FICR_MT400006CA)

Scenarios

The example messages developed for this value were created in sets; also known as scenarios. Scenarios usually cover an entire transaction, or multiple transactions and allow the creation of sets of messages that rely on each other's data (e.g. in a request/response scenario, the message id of the request message is echoed in the response message).

Known Issues

Validation Errors

- No known validation issues.

Content Issues

- Dates within each scenario are not always aligned with each other (request message creationTime before the response message creationTime)
